

Notes:

- 1) This column may be manufactured to your height specification of 8' as shown.
- 2) A 3 1/2" OD Schedule 40 steel pipe is fitted interior to the cast iron and is continuous for the entire length of each column. Consult your engineer for schedule required.
- 3) If you require any specific attachment details on either end of the column, please send us the details so we can revise the quoted price and this approval drawing.
- 4) The decorative capital and base details will be permanently attached to steel pipe and can not be adjusted.
- 5) Fluted shafts are made of segments and seas may be visible. Hairline cracks may occur during shipping at segment seams due to the length of columns. These are not structural as the decorative segments are not part of the internal structural steel pipe.

WEIGHT: 273 lbs.

Rev. 1-15-09
